This page demonstrates some of the capabilities of the C.R.O.S.S. PDF and Lineart Engines.

First it shows rotation and translation of the C.R.O.S.S. logo.

Then the effects of skewx and skewy on the C.R.O.S.S. MICR font.

It shows lines drawn with various colours, line widths and dash patterns.

Circles drawn and then combined into polylines which are then filled.

Lastly it shows possible application of the lineart engine to generate graphs.
